Kallar, Kerala, Kerala, 671532, IN

Computer Science graduate with practical experience in Python and Django web development. Built management systems, e-commerce platforms, and responsive websites, focusing on clean code, usability, and efficient application performance.

Work Experience

Wordpress Web Developer

Aug 2025 - Present

Supremeone Software

- Develop and customize responsive WordPress websites using themes, plugins, and page builders (Elementor, WPBakery, etc.)
- Maintain and update existing company and client websites to improve performance and user experience
- Implement SEO best practices including meta tags, image optimization, schema markup, and site structure

Web Developer Intern

Sep 2024 - Dec 2024

Riss Technologies

- Completed a series of Python-based projects as part of a leadership-focused learning community.
- Developed a Pharmacy Management System using Python and Django, simulating real-world e-commerce functionality for purchasing medicines.
- Gained hands-on experience in full-stack development using Python, Django, JavaScript, and responsive front-end frameworks.

Projects

Belling and Announcement management System

Designed and developed an automated system for managing scheduled bell rings and audio announcements, ideal for schools and institutions. Users can create and customize daily schedules for different events, ensuring timely alerts without manual intervention. The system features an easy-to-use interface, supports audio file uploads, and automates execution using background tasks, improving time management and operational efficiency.

Pharmacy Management System

Developed a user-friendly e-commerce platform for purchasing medicines online without the need for prescriptions. The system allows users to browse and search for medicines, add items to a cart, and place orders securely. Admins can manage product listings, track inventory, view orders, and handle customer data. Integrated features like order history, payment gateway support (if applicable), and automatic stock updates ensure smooth and efficient pharmacy operations while offering customers a convenient buying experience.

JCB Business Information Website

Developed a responsive business information website for JCB to showcase its services, company profile, and contact details. Designed a clean and professional UI with a focus on user experience, brand consistency, and mobile responsiveness. The site includes key sections such as company overview, project highlights, and a contact form,

making it easy for visitors to learn about JCB and get in touch. Ensured fast loading, cross- device compatibility, and basic SEO optimization for better online visibility.

Dairy Farm Business & Product Website

Developed a responsive static website for a dairy farm to showcase its business profile and core product—fresh milk. The website includes sections such as farm overview, product quality details, health benefits, and contact information. Designed with clean UI and mobile-first responsiveness to ensure accessibility across devices. Focused on performance optimization, fast loading, and intuitive navigation to offer a seamless user experience. The site was deployed using GitHub Pages for easy access and version-controlled updates.

Core Skills

Python, Django, Android Studio, MySQL, Javascript, HTML, CSS, C/C++, Java, Bootstrap, WordPress
